THE FEUARDENT LIBEL CASE

TESTIMONY OF GENERAL DI CESNOLA.

DEFINING THE CR/No. 2 MADE IN THE COLLECTION.

General di Cesnola continued his direct testimony in the United States Circuit Count, where the Feuardent-Di Cesnola libel case is now progressing. He stated that he received an offer for his collection in 1870 from M. Laden. Acting French Consul at Cyprus, which he understood to be a personal offer of Napoleon III. It was for 265,000 francs. This was for the collection without duplicates. He refused it and demanded 500,000 francs. No. 39 was exhibited in court, and Aphrodic and Eros. General di Cesnola said that No. 39 was monolithic to the ankles. These had been found in a shattered condition. They had been repaired and used, together withfanother piece of Cyprus stone, to support the statue. The head which Mr.Fenardent said belonged to the statue was shown in court and its want of correspondence demonstrated. Moreover, the head belonged to a round state. No. 39 is a wall statue. The witness said that the bottom of Aphredite and Eros had been made flat to stand on a pedestal. The statue from the neck down was one piece of stone. Hercules had been found in one piece irona the thighs up, with the exception of the left forearm and club. This and the legs and the base with the feet were found separately near by. The legs were broken obliquely near the ankles, and in repairing this triangular space had been made good with blocks of Cyprus stone. This was done to strengthen the support of the statue. A bath had disclosed the carving on the front of Hercules. The dove on the Bearded Venns, General di Cesnola said, was possessed of a stone tail and stone wings when the statue was found. He did not know that the bird had been broken and wood with a plaster covering had been substituted by Gehlen, until after the publication of the charges. The mirror, he said, in No. 157 was disclosed after a prolonged bath which freed the surface of the stone from encrustation. General di Cesnola pronounced the statement that he had had it carved to be the grossest and most unmittigated DEFINING THE CH/NG CO MADE IN THE COLLECTION.

PROTECTING THE FORESTS. REQUESTING STATE LEGISLATION.

PROFESSOR SARGENT, OF HARVARD, BEFORE THE CHAMBER OF COMMERCE COMMITTEE,

CHAMBER OF COMMERCE COMMITTEE.

Morris K. Jesup, chairman of the Chamber of Commerce Committee on the Preservation of the Adionalack Forests, presided yesterday at a meeting of the committee. There were also present D. Willis James, C. N. Bliss, Charles S. Smith, and T. B. Coddington, members of the committee, and C. S. Sargent, Frofessor of Arboriculture at Harvard College. An informal discussion took place between Professor Sargent and members of the committee relative to the results from a scientific point of view which will inevitably follow unless the forests in the northern part of this State are preserved by legal measures. Frofessor Sargent said that the most important feature of the question was the general testimony of people living near the forest regions that the rainfall lessened as extensive clearings were made. He called attention especially to the streams which flow into the Black River,—the most important feeder of the eastern end of the Eric Canal—and said that the lessening of the water in this river would be attended with serious results to canal navigation. In speaking of the possibility of deepening the canal, he said that it could not be deepened an eighth of an inch with the present water supply.

Professor Sargent urged the committee to protect the forests from the invasions of railreads, since great destruction of timber was sure to follow in the line of a railroad, not alone from the necessary falling of trees, but also from fires. He suggested the question, whether the Adirondack Railroad Company had not forfeited its charter, but none of the committees could answer it. The depredations of the lumbernen in the Adirondack were declared to be going on regardless of consequences, and unless something was done to stop men the damages would be irreparable. One remedy that he suggested was the removal of the tariff on lumber—\$2 a thousand feet; but Mr. Bliss replied that the introduction of the tariff guestion might involve the committee in hot water.

Mr. Smith suggested that since much o

Further, your case to be tried under laws formed entirely by women, in which neither you nor any man had ever been allowed a voice. Somewhat as you would feel under such circumstances you may be assured, on reading this, I have felt during the trial to-day. Ferhaps the women would be leulent to you, the sexes do favor each other, but would you be satisfied? Would you feel that such an arrangement was exactly the just and fair thing? If you would not, I ask you, on the principle of the Golden Kule to use your inducence for the enfanchisement of women

LIVING WITH A BULLET IN HIS BRAIN.

Charles Reimer while playing with a small revolver at his house, no. 98 Sumpter-st, Brooklyn, on October 28, shot himself in the head. The bullet entered the right side of the skull one and a half inches above the right ear. It took a downward direction, passing through the middle of the head. Its whole course, however, appears to have been through the cerebrum. The physicians put him on anti-phologistic treatment, expecting his early death. He rallied after the nervous shock, gradually recovered, and is now at work as usual. The physicians traced the course of the bail fully six inches into the brain with a probe, so that they have no doubt as to its course. The wound appears to have healed throughout. A Montain postimaster, who arranges the mails for the little town of Birney, lives eighty miles from a notary public. When he sent in his first quarterly report he administered the oath to himself and then certified to the correctness of the account. A reply soon came back from the red-tape headquarters in Washington that he had violated a secred precedent and most get a notary to swear him. His refort was that he knew no precedent which would assure him mileage and travelling exienses for 160 miles in order to get a notary's signature. This left the Department not a leg to stand upon and they have since preserved a discreet silence and allowed the Montain man to swear as he pleased.
